Power Tools

Paslode's CF-325 cordless framing nailer features a newly designed nosepiece that is more aggressive than its processor and redesigned "no-step" fuel canisters that eliminate the peruse snapping, twisting and aligning required by previous models. The new fuel is guaranteed to deliver at least 1,200 drives and offer an 18-month life. In addition, CF-325 can go five times longer (50,000) drives between recommended cleanings, the manufacturer says.
