Paslode Framing Nailer

The CF325 Cordless Framing Nailer has a newly-designed nosepiece to allow sure-footed toe-nailing at any angle. The cordless framer is also engineered to deliver faster firing in hard-to-reach spaces. The QuickLode Fuel System is designed to eliminate pre-use snapping, twisting and aligning. The fuel is guaranteed to deliver at least 1,200 drives and offer an 18-month life according to the manufacturer. Nail capacity is up to 45 paper collated fasteners. Other features include steel O-rings to reduce downtime due to maintenance and a non-slip grip to reduce wear and tear on the user.
