Another First From Paslode® A Fuel Powered Cordless Roofing Nailer System

Remodelers Can Work Smarter & Faster

Baltimore, 2010 Remodeling Show – Paslode® is introducing the world's first Fuel Powered Cordless Roofing Nailer System, Model CR175C. The convenience and efficiency of fuel powered cordless ensures professional remodelers get a powerful, lightweight and compact tool that helps increase productivity, reduce jobsite clutter and project downtime, and increase profits.

This revolutionary tool is easy to use, drives two nails per second and holds 120 nails per coil. Like other fuel powered cordless tools, the Paslode roofing nailer drives nails sequentially by pushing the tool down and then pulling the trigger. It is faster than hand nailing and is perfect for a wide range of roof-related remodeling jobs, including roofing dormers and small additions, installing skylights, or working on garages and storage buildings.

By design, the Paslode Cordless Roofing Nailer contributes to precise nail placement, which helps eliminate issues of *high nailing*. Additionally, Paslode's new cordless roofing nailer features an adjustable depth of drive which reduces and often eliminates shingle blow-through. Together, these features translate into a higher quality roofing job.

This tool has a single door magazine for easy loading, skid guards and a belt hook. It comes with an adjustable shingle guide for precise nail placement and has a soft grip handle for greater control. The Paslode Cordless Roofing Nailer System can drive 2,200 nails per battery charge, and 950 nails per fuel cell.

Roofer's Choice™ Fuel + Nail Packs with PowerBoost™ Nails

The Paslode Cordless Roofing Nailer uses Roofer's Choice™ Fuel + Nail packs, which maximizes the tool's performance and means you never run out of fuel before you run out of nails. Each pack comes with one quicklode™ fuel cell and six coils of nails (or 720 nails per box). The nails feature the PowerBoost™ Black Tip Coating for superior ease of drive and a unique vertical groove design for better holding power than standard roofing nails. Each Fuel + Nail Combo Pack contains enough nails to do two squares (200 square feet), your typical roofing repair job.

The Paslode Cordless Roofing Nailer System, Model CR175C, comes with a convenient backpack and one Roofer's Choice™ Fuel + Nail Pack, as well as a safety tether, rechargeable battery, charger and safety glasses. It also features a one year full coverage warranty and five year limited warranty. For more information, go to www.paslode.com or call 1-800-222-6990.
